Assistant Commissioner for Patents
BOX NON-FEE RESPONSE
Washington, D.C. 20231

Sir:

In the Office Action dated May 4, 1999, in numbered paragraph 5, the Examiner has noted that the prior art identified in the Information Disclosure Statement dated June 12, 1998 was not received even though the statement was received. Applicant is submitting herewith true and correct copies of the postcard which applicant's attorney submitted with the Information Disclosure Statement showing that 56 references were included. A stamp showing Patent and Trademark Office receipt on June 15, 1998 appears on the

card. In addition, applicant is submitting a true and correct copy of the Information Disclosure Statement dated June 12, 1998 and an additional set of the prior art which was submitted with that Information Disclosure Statement. While it is only speculation, perhaps the fact that the copies have a thickness of about 6 inches, resulted in their not fitting into the file. If this is an accurate speculation, is there some location where they might have been placed?

Applicant is faced with its having complied with the rules and being entitled to have the full benefit of the Information Disclosure Statement and does not wish to lose that benefit solely because the United States Patent and Trademark Office failed to deliver the copies to the Examiner.

The current submission is being made in an effort to remedy the loss of the copies within the Patent and Trademark Office.

The undersigned attorney hereby certifies that the prior art was attached to the Information Disclosure Statement when he signed page 3 of the same on June 12, 1998.

Applicant's attorney is having his secretary, Sylvon McCarthy, read this letter and sign and date the same in order to attest to the fact that she personally collected the art, typed the Information Disclosure Statement, presented it to me for signature and after my signing the same, personally

placed it in a box which was then mailed to the United States Patent and Trademark Office.

Respectfully submitted,

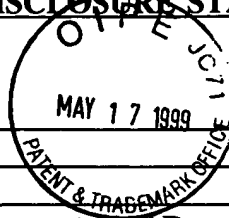

Arnold B. Silverman
